Department for
Business & Trade

About the Assembly

We are pleased to invite you to the WMHTIA International Assembly - a flagship conference, exhibition and brokerage event designed to promote international collaboration with the West Midlands Health Tech Innovation Accelerator (WMHTIA) and the wider UK and West Midlands health tech sector.

Over the course of 3 days, you will benefit from an exclusive programme of activities designed to help you appreciate emerging trends and opportunities in the UK and to establish partnerships with leading innovators, researchers and industrial players in the UK and beyond.

You will have an opportunity to meet regional innovators and industry leaders, partake in insightful workshops and visit the Birmingham Health Innovation Campus.

To see the full event agenda, visit the event registration page via the link below.

We are welcoming businesses and other organisations involved in design, development and deployment in the following: medical devices, robotics in healthcare, AI, VR, healthcare infrastructure, wearable medical devices, telemedicine, mobile health applications, genomics, precision medicine, mHealth, medical imaging and health analytics.

Why the West Midlands?

The West Midlands stands at the forefront of Health Tech innovation. Leveraging world-class facilities, manufacturing prowess, and links to the rest of the country – the region is home to one of the largest medical company clusters in the UK.

- £10.3bn full-service healthcare & life sciences economy
- 17,000+ dedicated healthcare professionals
- £4bn bio-pharma services and supply sector – the second biggest in the UK
- £1.7bn Med Tech economy
- A diverse, static patient population of 4.7m
- 8 NHS Trusts + 80 hospitals
- 4,000+ GPs and community health centres
- 35 Centres of Clinical Excellence
- Largest genomics lab hub in the UK
- 4 leading medical schools with 11,000 medical science graduates every year
- 600+ healthcare and life sciences businesses
